+91-9322536069 | prathameshtalekar18@gmail.com | LinkedIn | GitHub | LeetCode | CodeChef

Summary

Software Engineering student at PICT (CGPA: 9.52) with strong Python, Java and C++ fundamentals (600+ LeetCode problems solved) and internship experience building backend automation, scheduled jobs and REST-based services on AWS within Agile teams. Hands-on with data analysis, ML model deployment and LLM integration. Seeking to build automation, diagnostic tools and supportability solutions for large-scale cloud systems.

Education

Pune Institute of Computer Technology (PICT), Pune

Bachelor of Engineering – Information Technology

CGPA: 9.52

Sept 2023 – May 2027 (Expected)

Experience

TenancyPassport

March 2026 – June 2026

Java Backend Developer Intern

Remote

- Built **automation** workflows for agency invitation, rent reminder, and certificate expiry using **Java**, **Spring Boot**, and **REST APIs** within an **Agile** team, powering **4 core modules** in a distributed **microservices-based** architecture.
- Designed **cron-based** scheduled background jobs with **Spring Scheduler** and integrated email notifications via Spring RestClient, DTOs, and **JSON** REST API communication, eliminating manual follow-ups for **100+ active tenancies**.
- Integrated **AWS S3** to store and retrieve email templates, decoupling notification content from application code and enabling template updates without redeployment.
- Implemented validation, notification **logging**, and idempotency checks to prevent duplicate email delivery and trace delivery status, supporting troubleshooting, root-cause analysis, and **code review** cycles across **5+ concurrent client workflows**.
- Developed the agency invitation workflow, triggering automated emails after agency creation and persisting data in **MongoDB**.

Projects

CreditWise – Financial Advisory Platform | Python, Flask, Java, Spring Boot, MongoDB, XGBoost

- Architected a full-stack financial decision-support platform using a Java Spring Boot backend, a **Python** Flask machine learning **microservice**, and a React frontend to deliver real-time loan approval predictions via **REST APIs**.
- Performed **data analysis** and trained an XGBoost model in Python (Pandas, scikit-learn), applying SMOTE to address class imbalance. Implemented FOIR and EMI analytics enabling bank recommendations, approval probability estimation, and historical trend analysis using MongoDB.
- Optimized backend performance by parallelizing multi-bank recommendation requests using Java **multithreading** with **parallelStream()**, reducing response latency and eliminating sequential API bottlenecks.
- Built a responsive React **dashboard** with loan comparison, personalized recommendations, borrower roadmaps, and historical prediction logs.

AarogyaAI – AI-Powered Telemedicine Platform | Node.js, Express.js, MongoDB, WebRTC, Socket.io

- Developed a full-stack MERN healthcare platform with secure **JWT Authentication** and **Role-Based Access Control (RBAC)** for patients and doctors.
- Integrated low-latency WebRTC video consultations using Socket.io for signaling (peer-to-peer **networking**). Built an AI Health Assistant using Generative AI / **LLMs** with prompt engineering for context-aware medical responses.
- Engineered secure medical record management with Multer, Cloudinary, and MongoDB, enabling cloud-based storage and retrieval of prescriptions and healthcare documents.

Technical Skills

Programming Languages: Python, Java, C++, SQL

Backend & Automation: Spring Boot, Spring Scheduler, Flask, Node.js, Express.js, REST APIs, JSON, Microservices, Scheduled Jobs, Logging

Cloud & Networking: AWS (S3), Computer Networks (TCP/IP, HTTP, DNS), WebRTC

Databases & Data: MongoDB, PostgreSQL, MySQL, Pandas, Data Analysis, Dashboards

AI/ML: XGBoost, scikit-learn, LLM Integration, Prompt Engineering

Frontend: React.js, JavaScript

CS Fundamentals: Data Structures & Algorithms, OOP, System Design Fundamentals, DBMS, Operating Systems

Tools & Practices: Git, GitHub, Maven, Postman, Agile, SDLC, Unit & Integration Testing, Debugging

Honors & Awards

- LeetCode: Solved 600+ DSA problems (Max Rating: 1710)
- Runner-up – Pradnya (Coding Contest), PICT INC 2026
- CodeChef: 2-Star (Max Rating: 1490)

Extracurricular Activities

- Lead – Enigma Competition, IEEE Student Branch, PICT
- Credenz 2026 – Logistics and Coordination Team Member
